Education

University of California, San Diego — **San Diego, CA**
College, Class of 2030 — *2026-present*
Math - Computer Science

Nový PORG IB Program — **Prague**
IB Diploma Program — *2024–2026*

Nový PORG — **Prague**
High School — *2017–2026*

Academics

SAT: 1550 (Reading & Writing: 760, Math: 790)

IB: 39/45

- HL Math AA: 6
- HL Economics: 6
- HL Physics: 7
- SL English A Language and Literature: 6
- SL Spanish: 6
- SL Chemistry: 5
- TOK & EE: 3

Work Experience

Second Foundation Tech a.s. (October 2024 - June 2026): Junior Developer - Enterprise Resource Planning team member, worked on automating manual processes
frameworks: OpenAPI, Angular, Python, Dagster

Czech Academy of Sciences, Institute of Information Theory and Automation (January 2025 - December 2025): Internship - Machine Learning, map analysis and data extraction
libraries: PyTorch, NumPy

PizzaHut (September 2023 - January 2025): Job at PizzaHut - making and selling food, other necessary tasks

CinemaCity (August 2024 - October 2024): Usher, responsible for preparing auditoriums before/after movie

Projects

2024: PlantIdentifier - Phylogenetic tree creator app, made using pure HTML, CSS and JavaScript. Originally scripted in python and remade in JavaScript for ease of use, this app uses REST APIs of an external database to obtain up-to-date data on plants and animals. Working version can be found

on https://plants.simokapi.com

2024: DropStorage - A cloud storage service, made using HTML, CSS and Javascript for the frontend and BunJS for backend RESTful fetch API. Makes use of cookies, sessionIDs and a PostgreSQL database running on the backend to authenticate the user. Can be found on https://storage.simokapi.com

2024: Bouncer (>1k downloads) - A Physics-based Meta Quest VR game built using the Unity Game Engine. Successful implementation of the Oculus development kit and a well-functioning game which is both simple and fun to play in your spare time. Game can be found at: https://www.oculus.com/deeplink/?action=view&path=/app/2599835042642287 3&ref=oculus_desktop

2024: Java 3D Renderer - Made using Java, this program takes an ASCII styled STL file, loads the triangles and vertices, and calculates the 3D transformation relative to the camera, computing the 3D to 2D projection and rendering simple shading

2023: Duck Racer - A duck simulator, with infinitely generated terrain and obstacles. Made in Unity

Other Positions / Volunteer work

2024-2025: Leader of school Physics club

2023-2024: PORGMUN member of IT department

2024-2025: PORGMUN head of IT department

2025-Present: Member of school's student council

2024-Present: Website developer for the International Student Film Festival https://studentshorts.com and co-organizer of my school's version

2023/2024: Volunteer at Forum 2000 annual global conference in Prague

Extracurriculars

2021-2022: Member of school Robotics club

2022-2023: Various MUN related activities

2023: Participated in CEE Hackhealth 2023 Hackathon (in-person participation at IKEM)

2025: Won 1st place at CEE Hackhealth 2025 Hackathon at IKEM, as well as the IKEM and caelestinus* prizes

2025: Member of the caelestinus* startup incubator batch of 2025

2025: Finalist in the Technological Literacy Olympiad at ČVUT

2025: Represented the Czech Republic in the UNICEF International hackathon for climate action

Courses

2022: CS50 AI - Machine Learning and Artificial Intelligence online self-paced course, with passing grade

2022: Santa Barbara City College - college level class for 3D modeling and design with Autodesk Maya software

Languages

English: Native *Passed the CPE Cambridge exams at C2 level with grade B*

Czech: Native

Spanish: A2

Computer skills

Languages: Python, Java, C#, HTML, CSS, JavaScript, Kotlin

Skills: Machine Learning, APIs, web design, game development

Others: Unity Engine, NGINX, PostgreSQL

Frameworks: Micronaut, Hibernate
